Education

- **Aptech Institute**
  Web Development Smart Professional

- **Private**
  Intermediate

- **Al-Hamd School**
  Matriculation

Experience

- **Digitech Infra Associates**   Nov 2023 - Present
  FrontEnd Developer
  - Front-end Development with hands-on experience in creating responsive and user-friendly web applications
  - Proficient in HTML, CSS, and JavaScript
  - Implemented and maintained UI components, ensuring consistent and intuitive user experiences across different browsers.
  - Participated in code reviews, debugging, and troubleshooting to optimize website performance.
  - Demonstrated a strong understanding of UI/UX principles, contributing to the improvement of overall user interfaces.
  - Eagerness to learn and adapt in a fast-paced, collaborative environment, contributing to the success of webdevelopment projects.

Projects

- **Kaasib**
  - Developed from scratch based on Figma design, kaasib is a responsive and visually appealing website. The project involved creating a seamless user experience and interface using HTML, CSS, Bootstrap and JavaScript. Additionally, I migrated the entire HTML and CSS code to be hosted on a Laravel/PHP framework, enhancing the site's functionality and performance.

- **Bachatmart**
  - Created bachatmart based on a Figma design, focusing on a user-friendly and responsive layout. Utilized HTML, CSS, and JavaScript to ensure a dynamic and engaging shopping experience

- **Property world**
  - Rebuilt the propertyworld website by converting its original WordPress design into a custom-built site using HTML, CSS, and JavaScript. Hosted on PHP/Laravel, the project included replicating the Figma design and enhancing the site's functionality and performance.

- **Data entry softwere**
  - Developed the complete frontend and implemented the backend for Leveraged HTML, CSS, JavaScript, and backend technologies to create a secure and efficient data entry platform.

- **Stingrays**
  - Cloned the digitechinfra.com website and customized it to meet the client's requirements for stingrays.pt. The project involved replicating the existing design and adapting it with HTML, CSS, and JavaScript for a new brand identity.

- **Cloud host shop**
  - Updated the design and content of cloudhostshop.com, ensuring the website remains modern and user-friendly. Employed HTML, CSS, and JavaScript for design enhancements and content management.
